

## KS3 Unit 44 Trigonometry

Topic/Skill	Definition/Tips	Example
1. Trigonometry	The study of triangles.	
2. Hypotenuse	The <b>longest side of a right-angled triangle.</b>  Is always <b>opposite the right angle.</b>	
3. Adjacent	<b>Next to</b>	
4. Trigonometric Formulae	<p>Use <b>SOHCAHTOA.</b></p> $\sin \theta = \frac{O}{H}$ $\cos \theta = \frac{A}{H}$ $\tan \theta = \frac{O}{A}$  <p>When finding a missing angle, use the ‘inverse’ trigonometric function by pressing the ‘shift’ button on the calculator.</p>	 <p>Use ‘Opposite’ and ‘Adjacent’, so use ‘tan’</p> $\tan 35 = \frac{x}{11}$ $x = 11 \tan 35 = 7.70 \text{ cm}$  <p>Use ‘Adjacent’ and ‘Hypotenuse’, so use ‘cos’</p> $\cos x = \frac{5}{7}$ $x = \cos^{-1} \left( \frac{5}{7} \right) = 44.4^\circ$
