According to school officials, the virus was first detected in the midway of an English lesson, and it began with people fainting. The virus, named as "Respira-5" presented with similar COVID-19 variants, like symptoms of fatigue, low grade fever, struggle with breathing, dry cough, and early signs of zombification.

FROM CLASSROOMS TO QUARANTINE:
WILMSLOW HIGH SHUT FOR 3 WEEKS

What students say

Reporter: We're joined today by the 2 students steering Wilmslow high through the respira-5 outbreak. Sneha and Eva, Thanks for taking time out of your schedules. How did this all begin?

Sneha: It started with a cough in registration, then a fever. Then the school went silent, and within hours, we were sealed. No one in, no one out.

Eva: The virus- respira-5 is like COVID's dramatic cousin. It spreads fast, causes breathlessness, fatigue, and voice loss

Reporter: What would be your message to the outer world?

Sneha: We're not just surviving. We're adapting- with sarcasm

Eva: Respira-5 may have taken our voices but it hasn't taken our spirit..
